"I DON'T KNOW"!

MR. BLACK AND HIS SIGNATURE

YEO TRIAL

Witness Does Not Identify His Own Specimen

PASSAGES IN 4 HOURS' CROSS-EXAMINATION

A sensation was caused this morning, the third day of Carvalho Yeo's trial, when, at the end of the cross-examination of Mr. Thomas Black (of the Treasury) by Mr. F. C. Jenkin, C.B.E. (for the defence), counsel confronted the witness with the specimen signature lodged at the Hong Kong and Shanghai Banking Corporation by Mr. Black. Mr. Jenkin asked if Mr. Black could say if the exhibit was his own signature. Twice Mr. Black replied: "I don't know."

Altogether Mr. Black was subject to cross-examination for about four hours.

On its conclusion, Mr. H. G. Sheldon re-examined for the Crown and then the special jurors put a series of questions to Mr. Black until the tiffin adjournment.

It was announced that two of the "minor" Crown witnesses will be called this afternoon, among them Mr. Martin.

"TOLD TO BE CAREFUL"

The signature was pasted on strong paper of about six inches by three inches.

"That's About All"

He thought that Tsang Man-kun also brought back the Bank's numbers on those three cheques but the Bank's numbers on the cheques did not tally with the Bank's numbers on the stubs.

When Tsang On-wing wanted to come with me to the Bank, I told him to go back, said Mr. Black.

Mr. Jenkin, pointing to the exhibit: That is your specimen signature given to the Hong Kong & Shanghai Bank for this account.

"To See" & "To Report" Passages between Mr. Black and Mr. Jenkin lent added interest to the cross-examination.

At one stage counsel was seemingly indignant and Mr.

TO-MORROW'S HEARING

It is probable that the Carvalho Yeo trial will not be continued to-morrow morning because the Puisne Judge has to sit in Summary Jurisdiction but it is very likely that the trial will resume at 2.15 p.m.

Black replied with his face in a smile.

After an ominous pause of about a minute, during which the proverbial pin might have been heard to drop, Mr. Jenkin taxed the witness about his having said yesterday that he "did not see" the Hon. Mr. C. M. Messer, O.B.E. (Colonial Treasurer) before going to the Hong Kong & Shanghai Banking Corporation on the afternoon of Jan. 18 to see the three cheques which form the subject matter of the indictment.

Mr. Eldon Potter, K.C., who is leading for the Crown, intervened, pointing out that opposing counsel had only asked whether Mr. Black "had made a report" to Mr. Messer.

Mr. Black finally added: "You told me to be careful."

Discoveries

At the resumption this morning, Mr. Black replied that he had no desire to give any explanation or addition to the evidence he had given in cross-examination yesterday.

The first thing discovered, said Mr. Black, when the cover of a used cheque book was found (among the "junk" in the messengers' room, as stated yesterday) was that there had been an alteration in the numbers. "I think Mr. Messer, Mr. King (Director of Criminal Intelligence), Mr. Proctor (of the Hong Kong Bank) and Mr. T. Dallin (of the Audit Dept.) were present then," witness added.

When Tsang Man-kun came back from the Bank on Jan. 18 with the numbers of the three cheques, witness examined the stubs in the Treasury and found that the Treasury serial numbers on those three cheques tallied with the Treasury serial numbers on cheques already

WRECKED "VESTRIS" INQUIRY

A RESUMPTION

AN IMPORTANT ADMISSION BY CHIEF OFFICER

LIFEBOATS AND DISCIPLINE

New York, Yesterday. At the resumed inquiry into the loss of the "Vestriss," Attorney General expressed his intention of adopting the suggestions made by Captain McConky, the British Assessor, with a view to throwing light upon the disaster.

Mr. Frank Johnston, chief officer of the "Vestriss" (recalled) admitted that the release mechanism of the lifeboats was unsuccessful and that the discipline was unsatisfactory when the vessel was sinking, members of the crew being absent from their stations at the lifeboats.—Reuter's American Service.

NEW PRIMATE

DR. LANG FORMALLY ELECTED

IMPRESSIVE CEREMONY

London, Yesterday. Dr. Cosmo Gordon Lang, Archbishop of York, was elected Archbishop of Canterbury by the Dean and Chapter of Canterbury to-day.

The ceremony was impressive, each member of the Chapter proceeding to the table of the notary public and affixing his signature to the voting form. Following this, the Dean declared that the election of Dr. Lang was unanimous.—British Wireless Service.

SINGAPORE FLYERS

SIR CHARLES WAKEFIELD TO GIVE SEAPLANE

CLUB'S ACTIVITIES

Owing to the generous action of Sir Charles Wakefield, who has given many demonstrations of his practical interest in aviation, the Singapore Flying Club will shortly be in possession of another Moth seaplane without any additional cost to members. Sir Charles Wakefield is an hon. member of the club, and as such he was asked whether he would care to subscribe to the debentures which are being raised for the purchase of a new machine.

A cable in reply was received recently. In it Sir Charles says that he will be very pleased to pay the cost of the new machine himself.

When the Wakefield seaplane arrives, the club will have a fleet of three. It is hoped to obtain a fourth very shortly.

Sir Charles Wakefield is governing director of C. C. Wakefield and Co., Ltd., the oil manufacturers. It will be remembered that he financed Sir Alan Cobham's flight to Australia and back.

"My Business"

"Then (on Jan. 18) I didn't have much time to think about it. My

—Reuter.

FREE STATE

THE BRITISH BOXER INDEMNITY

M.P.'S QUERY

OFFICIAL REPLY REGARDING THE FUND

SINO-AMERICAN BOARD

London, Yesterday. In the House of Commons, Viscount Sandon asked whether, with a view to the altered composition of the Chinese Section of the Board of Trustees of the United States Boxer Indemnity Fund, action would be taken to forestall much development in the case of the British Fund.

Mr. G. Locker Lampson (Under Secretary for Foreign Affairs) replied that the Board of Trustees of the British Fund could not be established until the Parliament passed a bill to amend the 1925 Act, but that the Government would bear in mind the change in the Sino-American Board of Trustees when considering their own future action.—Reuter.

FREE STATE

TO ESTABLISH EMBASSIES IN BERLIN AND PARIS

MR. SMIDDY'S NEW POST

London, Yesterday. It was announced in the Daili at Dublin that Mr. Smiddy, Irish Free State Minister to the United States has been recalled and appointed High Commissioner to London.

The decision to establish Free State embassies in Berlin and Paris is also announced.—Reuter.

NEWFOUNDLAND

AN EFFICIENT TRADE AGENCY IN LONDON

St. Johns, N. F., Yesterday.

The Premier, Sir Richard Squires, in an interview said the Government's policy with regard to the abolition of the High Commission's office in London was to substitute therefor an efficient Trade Agency.—Reuter.

TUNNEL SMASH

SIGNALMAN CHARGED WITH CULPABLE NEGLECT

London, Yesterday.

The railway signalman, James Gray, who was charged at Glasgow Sheriff Court with culpable neglect of duty in connection with the recent collision at the Queen Street tunnel, has been remanded on bail.—Reuter.

ANGLO-PERSIANS

ACQUIRE ONE OF GERMANY'S LEADING OIL CONCERN

Berlin, Yesterday.

Negotiations are nearing a successful conclusion by which the Anglo-Persian Oil Company will acquire control of the Olex Petroleum Company, one of the leading oil concerns in Germany.—Reuter.

QUAKE IN MANILA

Manila, To-day.

An earthquake, believed to be of local origin, aroused Manila at one o'clock this morning. No damage is reported.—Reuter.

WORST STORM SEEN IN 34 YEARS

BIG LINER ARRIVES

PASSENGERS COMFORTABLE ON "EMPERESS OF CANADA"

ANOTHER SHIP TURNS BACK

London, Yesterday.

In the House of Commons, Vis-

count Sandon asked whether, with a view to the altered composition of the Chinese Section of the Board of Trustees of the United States Boxer Indemnity Fund, action would be taken to forestall much development in the case of the British Fund.

All the way across from Vancouver to Yokohama, Japan, along what is known as "Quick, Short Route," the "Empress of Canada" met exceptionally bad weather.

When about three days out from Vancouver, the elements were at their worst. Slight damage was caused to a superstructure; but the liner's seaworthiness was proved by the fact that the majority of the passengers were comfortable.

Even an Indian stowaway who came down from Shanghai without paying his fare showed signs of contamination by the feeling of general comfort on the ship.

Two Days Regained

Normally, the "Canada" crosses the Pacific in 10 days. This time she took 13; but along the coasts of Japan and Shanghai, in about a week, she has regained two of the three days lost; and she will be on schedule when she returns from Manila.

Another ocean vessel, whose identity is not known except that she also flies the British flag, cleared from Seattle the day after the "Canada" left. One of her masts broke and she put back after two days.

The "Empress of Canada" will be back here on Sunday morning, Nov. 28. The "Empress of France," calling here for the first time, will arrive from Manila on Saturday, Nov. 24.

Therefore, both these giants will be in port together.

On Wednesday, Nov. 28, the "France" clears from Hong Kong for Shanghai, Japan and Vancouver, in the place of the "Canada." The latter leaves Hong Kong on the same day, but at 5 p.m., to return to the Clyde for alterations, sailing via Singapore and Suez.

FRESH AND FINE

N. E. winds, fresh and fine,

is the forecast till noon to-morrow.

The anticyclone, now central near Shanghai, is moving eastward. A somewhat deep depression to the N. E. Japan is moving E.N.E. The typhoon is about 600 miles E.S.E. of Manila moving westward. Fresh to strong monsoon will continue over the China Sea.

raised no objection to an adjournment.

Mr. d'Almada applied for bail.

Mr. Murphy said that he would have to oppose bail at this stage, because he had not yet had an opportunity to go fully into the case as it affected each individual accused. He particularly opposed bail in the case of No. 8 accused (one of Mr. d'Almada's clients).

His Worship said that he noticed from the charges that both of Mr. d'Almada's clients (Nos. 8 and 9) were charged with the joint possession of one of the forged notes.

Mr. Murphy said that these two men came to the house visited by the police, in company from outside the Colony, and one of them had the forged note in his possession. With regard to the other accused, Mr. Murphy said that each had in his or her possession one or more documents, which, to put it mildly, showed their connection with the matter.

Mr. Lindsell asked which of the two had physical possession of the note, and Mr. Murphy replied that it was No. 8 accused.

Serious Charge

The Magistrate told Mr. d'Almada that the charge against his clients was a serious one, and he did not feel disposed to grant bail for the present.

Mr. d'Almada said that he would not press for bail. He had formally made the application because he had been instructed to do so.

Mr. Murphy said that at the next hearing he would be able to deal with each of the accused individually and consider the matter of bail. For the present, he must oppose bail.

His Worship gave a formal re-

mand until 10 a.m., on November 28. Bail was refused.

THE COUNTERFEIT \$50 NOTES

SERIOUS CHARGE

11 CHINESE MEN & TWO CHINESE WOMEN INVOLVED

REMANDED WITHOUT BAIL

Another Chinese man has been added to the list of people arrested in connection with the discovery in the Colony of forged \$50 banknotes of the Hong Kong and Shanghai Bank, which had kept police investigators busy since Friday evening when a woman was first taken into custody.

The accused persons now number 13, of which 11 are men and two women.

Twelve of the 13 accused made their appearance before Mr. R. E. Lindsell, at the Central Magistracy this morning. The other accused, a man, was reported to be in hospital and unable to attend Court.

LIFE BELTS.

18 FORM SUBJECT OF POLICE PROCEEDINGS

A "CUMSHAW"

When a Chinese was this morning charged before Mr. R. E. Lindsell, at the Central Magistracy, with the unlawful possession of 18 life-belts, he claimed that he had bought them from a man on the Bowrington Canal bridge for \$1.50. This man had the appearance of being a go-down keeper, and he told him (accused) that the belts had been "cumshawed" to him by his master.

Asked what good the belts were to him, the accused said that he could make a little profit by re-selling them to a marine hawker.

When his Worship remarked that the belts were curious articles to steal, Inspector Macdonald said that they were old stuff and the police had no idea where the accused could have got them from. The cork inside the belt was quite good though.

The Inspector added that when arrested, the accused said that he was about to meet a man near the canal to buy the belts from him when a detective arrested him.

When the Police Arrived

When this was put to the accused, the latter said that the interpreter had misunderstood his statement. What he had said was that the man who offered to sell the belts to him asked for \$1.50 per picul, and they were going to his (accused's) house to weigh the things when the detective appeared. The owner of the belts escaped and he (accused) was arrested.

The Chinese detective was questioned and he said that at the time of his arrest, the accused was walking with another man, and they were followed by a coolie carrying the belts in two baskets. When the witness arrived, the accused's companion ran away. This man, who was wearing a raincoat, had the appearance of a seafaring man. This man removed the raincoat and discarded it as he ran, and witness picked it up.

The coolie, who was carrying the baskets containing the belts the accused admitted, had been engaged by him as a carrier, and therefore he (the detective) allowed this man to go.

Mr. Lindsell remarked to Inspector Macdonald that there was a doubt as to whether possession of the belts had passed from the seafaring man to the accused at the time of the latter's arrest. The fact that the other man ran away showed that he was the guilty party, therefore accused must be given the benefit of the doubt and discharged.

I DON'T KNOW!

(Continued From Page 1.)

business was to get payment stopped on them (the batch of thirty cheques stolen from the "second" book), Mr. Black stated in reply to another question.

Mr. Jenkins countered by asking Mr. Black what he thought now (about the discovery of the matter).

Mr. Black: Am I bound to give opinions?

Mr. Jenkins was about to say something, hesitated and ended with: "Very well, as you please, Mr. Black."

Turning to another point in the evidence, Mr. Jenkins asked: "Was the expression 'a mare's nest' ever used in your hearing at the Hong Kong Bank on Jan. 18?" — I'm afraid I can't say.

On being pressed, Mr. Black said that he did not remember.

Mr. Jenkins put it to witness that the expression was used.

Mr. Black: A suggestion was made that when we returned to the Treasury (from the Bank) everything would be found to be correct.

Mr. Jenkins: Was it made by one of the party of Government officials who went to the Bank? — I believe it was made by Mr. Dallin.

No Hope in My Breast

On Mr. Jenkins asking if Mr. Black held any hope then that everything would be found correct, the latter replied: "There may have been some hope in their breasts but certainly not in mine."

Mr. Jenkins taxed Mr. Black with having stated clearly last night that he had conveyed to the Bank his definite impression that the whole thing was faked.

Hereupon Mr. Potter asked to the effect that Mr. Black had only said that "to the best of his ability" he said it was forgery.

Mr. Jenkins: I put it to you that you expressed no doubt at all as to the authenticity of your signature.

— You're quite wrong.

Did you tell the Bank the names of the payees were absolutely foreign to you? — I thought it best not to say too much as other people were involved.

The statement by Mr. Black that "my only purpose in going to the Bank was to bring the (three) cheques back to the Treasury, on the Colonial Treasurer's instructions" caused an ominous pause.

MARRIAGE

DURRAN—HUNTER.—At the Peak Church, Hong Kong, on Wednesday, Nov. 21, by the Rev. Horace Johnston, John Durran, M.B., Ch.B. to Katharine Hunter.

Hong Kong, Thursday, Nov. 22, 1928.

HARD LINES, BUT—

There is much feeling in coastal and river shipping circles, we are given to understand, as the result of the remarks made by the Harbour Master the other day in the Marine Court when a skipper was brought up in connection with logging irregularities. It appears that the Harbour Master, a Naval Lieutenant-Commander, "let himself go" and it also appears, from a lay viewpoint, that he had justification. The skipper, from the evidence that was given in court, swung wide of the Merchant Shipping Act. There were three acts of omission. The wages return of an incapacitated officer was not rendered no draught and extent of clear side was recorded in the official log before proceeding to sea; a log entry was not signed by another member of the crew. Here, many would say, was a glaring case of negligence. So it was, but Lieutenant-Commander J. B. Newill, D.S.O., Harbour Master, does not appear to know what he is up against.

To seek to attain perfection in all things is a laudable ambition and there is no doubt that our Harbour Master, who of course would like everything in connection with his onerous duties to be "ship-shape," considered that the occasion was one which merited extreme verbal castigation. He knows, as everybody else knows, that river and coastal conditions

those who have gone before them. But the old terms lose their life. If our religious language is to be real it must be reinfused with life, constantly quickened by experience, and made operative by living conviction. — "Great Thoughts," London.

U.S.S. "Pampanga," the retired West River convoy gunboat, was sunk at sea yesterday by "Ashville" and "Sacramento."

The master of a cargo boat, who was charged with breach of the conditions of his licence by carrying passengers, other than those required to handle cargo, was, this morning, fined \$15 at the Marine Court. The defendant pleaded guilty.

The forthcoming marriage is announced of Mr. R. J. Vernal, architect, "The Blarney Stone," Pokfulam, and Miss K. L. Alderwick, No. 29, Belmont-road, St. Andrew's Park, Bristol. Mr. Vernal is in the Public Works Department and is hon. secretary of the Royal Hong Kong Yacht Club.

With six previous convictions for larceny and receiving against him, a Chinese, of no fixed abode, appeared at the Kowloon Magistracy this morning, charged with theft of an over-coat, a pair of glasses, and a small alarm clock from a flat in Yaumati yesterday. He was sentenced to 6 weeks hard labour.

Pleading guilty to a charge of lifting articles "from the bed of the sea" without a written permission from the Harbour Master, two cargo boat mistresses, who were arraigned before Comdr. J. B. Newill, D.S.O., R.N., at the Marine Court this morning, were each fined \$10. An order was made for the confiscation of the drags, grappings and other accessories, used for the purpose of salvaging the articles.

particular the former—are not what they might be; are not, indeed, what they should be. He also knows that the present state of affairs is the result of lax interpretation of Board of Trade regulations.

The object has always been—and it is a praiseworthy object—to make things easy for everybody concerned; Chinese shipowners have been able to "get away" with more things here than would be possible, no doubt, at any other port in the world. Suddenly Lieutenant-Commander Newill comes along and calls a halt. He administers a jar which is being felt throughout shipping circles. Owners, masters and officers are now in the position of the small boy who, after being allowed to do something which is naughty for a long time, is suddenly whipped for it. The skipper in this case was technically wrong but he is the victim of a system that is thoroughly wrong. And until Government obliterates that rotten system—the Marine Surveyor's Department knows all about it—it is distinctly hard lines for any individual officer who happens to come under the lash of suddenly-awakened officialdom.

His Majesty The King
A bulletin was issued yesterday by two of the physicians to H.M. the King to the effect that His Majesty is indisposed and confined to bed suffering from a cold accompanied by fever. The reassuring news, however, accompanied the announcement that no anxiety was felt regarding the King's condition. The time was when the issuing of such a bulletin would have denoted with certainty that the royal patient was in a very serious state of health, as it was the custom never to announce such matters to the general public until they could not safely be kept back. But such is not the custom nowadays. The news of royalty being indisposed is flashed from one end of the world to the other without delay, and full details as to progress or otherwise are not withheld. Throughout the Empire the news that His Majesty will, in all probability, be in normal health again in the course of a few days will be received with pleasure, as there can be little doubt that George the Fifth has, with the passing years, become more and more popular among all classes of his subjects.

At the Kowloon Magistracy, before Mr. E. I. Wynne-Jones yesterday afternoon, there was a sequel to an armed robbery committed by four men on board a sampan, in the Yaumati typhoon shelter on the night of October 23 last. Two men charged with complicity in the affair, entered pleas of "not guilty." They were not represented.

The prosecution was conducted by Sub-Inspector Dorling, who said that the robbery occurred at 9 p.m. whilst the sampan was made fast to the seawall in the typhoon shelter. Four men came alongside in a dinghy, and two boarded the larger craft on the pretext of searching for opium.

Then the mistress of the sampan was called on to a junk also lying by the seawall. Here she was searched by a third man who relieved her of her purse. She then raised an alarm, whereupon the man on the junk ran ashore and escaped. The two men on the sampan jumped into the water, whilst the fourth robber rowed the dinghy away.

The two men in the water were picked up by the master of the sampan and a friend, who handed them over to the police. The case was adjourned.

COASTAL MOVES

CHANGES IN SHIPS' PERSONNEL

NEW APPOINTMENTS

Captain A. Cook, of the "Shasi," has gone master, "Chinan."

Captain J. H. Gregory, of the "Hai Kwang," has gone master, "Ah Kwang," Exchange.

Captain F. L. Le Boutillier, from reserve, has gone master, "Hai Kwang,"—Shipping and Engineering.

At the end of the eighth round the badly-bruised boxer thought that he had had enough of it for one evening. The seconds did not agree with him, however, and declared that he still stood a chance.

"But," pleaded the boxer in a tired voice, "I can't hardly see 'im."

"Never mind," said one of the seconds cheerfully, "It's from memory."

One evening as a young cotton spinner and his sweetheart were nestled in the shadow of the trees, he proposed to her, and was readily accepted.

"But," she hastened to add, after a few minutes' reflection, "Aw mean to make some brass first."

"That's right, Becca," agreed her lover, "but after we've got that'll be to make brass last!"

At the end of the eighth round the badly-bruised boxer thought that he had had enough of it for one evening. The seconds did not agree with him, however, and declared that he still stood a chance.

"But," pleaded the boxer in a tired voice, "I can't hardly see 'im."

"Never mind," said one of the seconds cheerfully, "It's from memory."

The foreman suddenly caught sight of one of his labourers resting on an upturned bucket, and his indignation was immediately roused. Striding up to the man he shook him violently by the shoulder. "Now, then," he cried, "up you get and shift some o' them bricks, me lad!"

The labourer hesitated. "I don't feel well, guv'nor," he answered sadly. "I'm trembling all over."

"Oh, all right," returned the foreman, brutally indifferent to the other's suffering, "catch 'old o' this ere sieve then."

"On no account must you come to this house again. If you come, it will make no difference. I won't speak to you. I don't even see you."

A moment's silence. Wistfully and it seemed a little repentantly he bade him good-night.

It was morning. The telephone bell rang.

"Hello! That you? You remember I told you last night not to come to the house again?"

"Could I ever forget it?"

"Well, we're moving to-day. I thought you might like to know our new address."

KENNEL TO STAGE

MISS BILLIE BARNES FINDS RIGHT JOB

A woman of 24 who has been a milkmaid, a nurse in a Kent lunatic asylum, a draper's assistant, and a kennel maid is now among the principals of a London revue.

She is Miss Billie Barnes and is appearing in "Charlot 1928," which has just achieved its second edition at the Vaudeville Theatre, W.C.

Miss Barnes, who is tall, dark, and deep-voiced, said that she thinks she has found her right job in stage work. "I have no intention of trying anything else at present, although I did appear in a talking film the other day. I got on to the stage as an assistant in a rope-spinning act, and I was discovered as a singer through singing in the liner on my way to South Africa."

The prosecution was conducted by Sub-Inspector Dorling, who said that the robbery occurred at 9 p.m. whilst the sampan was made fast to the seawall in the typhoon shelter. Four men came alongside in a dinghy, and two boarded the larger craft on the pretext of searching for opium.

Then the mistress of the sampan was called on to a junk also lying by the seawall. Here she was searched by a third man who relieved her of her purse. She then raised an alarm, whereupon the man on the junk ran ashore and escaped. The two men on the sampan jumped into the water, whilst the fourth robber rowed the dinghy away.

The two men in the water were picked up by the master of the sampan and a friend, who handed them over to the police. The case was adjourned.

ly as has "Ol' Man River" in "Show Boat."

"Roll Away, Clouds" is a nigger spiritual. The song is composed by Mr. Jack Waller and Mr. J. A. Tunbridge of the producing firm, and is sung by a coloured actor, Mr. Walter Richardson.

The song has been, I am told, an immense hit with provincial audiences, and I should say that it is likely to jump into immediate popularity in London.

I was told that seats to the value of approximately £20,000 have already been bought by the libraries for the play.

PRAPS PRAPS NOT!

I have no wish to fly umpteen feet in the sky,

REVISION DUE

LEGATIONS DOYEN & CHINA'S TARIFF
SHOULD NOT BE TOO HIGH

Shanghai, Yesterday. "We think China ought to have tariff autonomy," declared Mr. W. J. Oudendijk (the Dutch Minister to China and Doyen of the Diplomatic Corps in Peking) in an interview to-day.

"The former tariff of five per cent. ad valorem was fixed by treaty with Britain in the days of low tariffs and it was at the time very advantageous to China. Things have changed since then and it is reasonable that China should have tariff matters in her own hands."

"I have been telling the Chinese that by fixing a reasonable tariff which would not be changed for some time, and thus giving a feeling of security to trade, they will satisfy both the Chinese treasury and foreign merchants. It is my impression that the Chinese will follow that line, while in future experience will show them that a reasonable tariff will bring in more revenue than high tariff which kills trade."

"I think the Chinese have too much common sense not to understand that."—Reuter.

BOMB OUTRAGE

HOUSE BLOWN UP IN
SYDNEY

Sydney, Yesterday. Serious damage was caused by a bomb thrown at a house at Kew belonging to Mr. Swanton, a prominent member of the Overseas Shipping Representatives' Association. Mr. Swanton himself was absent, but his family were in bed, and had narrow escapes.—Reuter.

By kind permission of Lt.-Col. L. J. Comyn, C.M.G., D.S.O. and Officers).

PUBLIC BAND CONCERT.

A Public Band Concert will be given in the

BOTANIC GARDENS

on SUNDAY, November 25th, from 4 to 5.30 p.m.

By the Band of the KING'S OWN SCOTTISH BORDERERS

Admission to Gardens free; 50 cents to Enclosure.

MACAO CHARITY AND COMMERCIAL FAIR.

THE EXECUTIVE COMMITTEE cordially requests the pleasure of the presence of the general public at the Inaugural Ceremony of the Fair on SATURDAY, 3rd November, 1928, at 9 p.m.

CHINA AND JAPAN

HITCH IN THE WANG-YADA NEGOTIATIONS

MR. YADA'S FUNCTIONS

Nanking, Yesterday. The conversations between Dr. C. T. Wang (Chinese Minister for Foreign Affairs) and Mr. S. Yada (Japanese Consul-General in Shanghai) have not been resumed, apparently, owing to a deadlock on the question of withdrawal of the Japanese forces from Shantung, but Mr. Yada has discussed the Salt and Tariff revision questions with Mr. Soong.

Apology Wanted

Later. Owing to pressure in connection with the negotiations for Treaty revision with other foreign diplomatic representatives, Dr. Wang was unable to see Mr. Yada to-day.

There is considerable speculation on this. The Foreign Office is reticent, but it is reliably learned that China is awaiting a definite announcement of the date of withdrawal of Japanese troops from Shantung.

Regarding a statement that the Japanese Government has now only authorised Mr. Yada to settle the Nanking and Hankow incidents, leaving Mr. Fujita (Consul-General at Tsingtao) to settle the Tsinan incident and Shantung question, Reuter understands that China will then demand that Mr. Fujita bring an apology for Japan's sending troops to Shantung, before he will be received.—Reuter.

FAMINE RELIEF

Shanghai, Yesterday. A Nanking message states that Feng Yu-hsiang (the "Christian General" Minister of War) has wired to General Lu Chung-hin (Vice-Minister for War), that he is anxious to go to Kaffeng to investigate famine conditions in the north-west of China Proper, and requests Lu Chung-hin to go to Nanking to take charge of the War Ministry during his absence.—Reuter.

WOMAN CURED AFTER 25 YEARS SUFFERING BY
POO ON CHINESE HERBS.

FIVE IN ONE FAMILY RESTORED TO HEALTH.

Mrs. F. Meinhart, who resided at 16, H. Street, Modesto Cal., U.S.A., says:—"For 25 long years I suffered with severe pains in my left side that at times confined me to bed for days. I was unable to do my work or move about. Along with these came dropsy and stomach trouble. I was unable to eat very much without causing gas, pain and distress. Words cannot express my suffering during these years. My husband spent thousands of dollars seeking relief for me. I have been to scores of doctors, many of whom were rated as specialists of high standing, but none was able to tell me what was the trouble and relieve me. Almost everyone went to a doctor. I was advised to have surgery operated upon or a change of climate for my dropsy and stomach trouble. Fortunately I was not operated upon but my family and I have spent years seeking a climate or medicine that would help me. We decided to try San Joaquin Valley and came to Modesto to reside. It was here after a time that I heard of the great benefit of the Poo On Chinese Herbs and after a few treatments with the Poo On Chinese Herbs we became well and have never been troubled since.

My daughter Blanch, a few years ago fell and hurt her side very severely and since that time she was troubled with pain in her side and was unable to find anyone or anything that would help her. The poor girl suffered so much that she had to quit work. A few treatments with the Poo On Chinese Herbs and the girl has been feeling normal ever since.

My whole family cannot express in words the gratitude towards the Poo On Chinese Herbs. They have brought health and happiness into our home and have stopped the seemingly endless doctor's bills. We all heartily recommend the Poo On Chinese Herbs and have sent many friends to the herbalist and in every case they have been benefited by the Poo On Chinese Herbs.

During this interview regarding this story, taken by a special representative of the newspaper, Mr. F. Meinhart, Sr., was present and said

"We are glad to tell anyone what Poo On Chinese Herbs have done for my family."

Thousands suffering from catarrh, bronchial and throat trouble, asthma, hay fever, malaria, stomach trouble, indigestion, constipation, gastritis, piles, fistula, heart and skin disease, oedema, scrofula, nervousness, insomnia, obesity, kidney and bladder trouble, diabetes, rheumatism, neuralgia, dropsy, pyorrhœa, epileptic fits, paralysis, tumors, ulcers, pimples, family trouble, dizziness, headaches, and many other chronic diseases, have been restored to health and happiness, without poisonous drugs, or the knife by the Poo On Chinese Herbs.

THE VOLUNTEERS

CORPS ORDERS ISSUED FOR THIS WEEK

ANNUAL CAMP DETAILS

This week's orders for the Hong Kong Volunteer Defence Corps issued to-day by Lt.-Col. L. G. Bird, D.S.O., Commandant, are as follow:—

Dress

South China Command order No. 1926/7 (ii) dated Nov. 13, 1928, is repeated for information and compliance of all officers.

Officers will wear Home Service Mess Dress with effect from Nov. 16, 1928.

Leather Belts

The Commandant notices that certain men are still in possession of leather belts. The attention of all O.C. Companies is drawn to previous Corps Orders on the subject and are directed to arrange with Corps Headquarters to change all leather belts for web.

Great Coats

Men proceeding to and from Camp will either wear great coats or carry them slung under Company arrangements. The practice of carrying the great coat over the arm to be discontinued.

Annual Camp

The following units will proceed to Fanling Camp from Friday evening, Nov. 23 to Sunday evening, Nov. 25.

Corps Band, Car Section, Motor Cycle Section, Machine Gun Company and Portuguese Company.

Men can proceed to camp the evening of the day before, i.e., on Friday evening of Nov. 23, 1928.

Those wishing to have their baggage sent to the Camp at Fanling must deliver it, clearly labelled with Owners' names at Corps Headquarters by 2 p.m. on Friday, Nov. 23.

Rations for 3rd week-end. O.C. Companies will report to the Adjutant, H.K.V.D.C., by 9 a.m. on Wednesday, Nov. 28, the number of all ranks attending camp, stating meals required, so that rations can be arranged.

All ranks are directed to take the top track to Camp, i.e., past Mr. Silva's bungalow, the M.L. Stables and through the gap to camp. The lower track through the fields must not be used.

Corps Band

There will be a full Band practice on Tuesday, Nov. 27 at 5.30 p.m. at Corps Headquarters.

Those who wish to shoot will parade in the Miniature Range at Corps Headquarters on Wednesday, Nov. 28, 1928, under R.S.M. W. H. Edmonds.

The Battery

Parade at Corps Headquarters at 5.25 p.m. on Friday, Nov. 23 and Tuesday, Nov. 27. Battery Drill.

Signalmen under Sgt. J. M. Jack.

Camp. The following are the dates on which the Battery will go into camp at Tai Lam, New Territories, this year.

1st Week-end p.m. Friday, Dec. 7 to p.m. to Dec. 9.

2nd Week-end p.m. Friday, Dec. 14 to p.m. Dec. 16.

Attendance at camp is a condition for efficiency.

Transport to camp will be provided as follows:—

Friday, Dec. 7 by Bus leaving Kowloon Ferry at 5.30 p.m.

Saturday, Dec. 8 by Bus leaving Kowloon Ferry at 2 p.m.

Friday, Dec. 14 by Bus leaving Kowloon Ferry at 5.30 p.m.

Saturday, Dec. 15 by Bus leaving Kowloon Ferry at 2 p.m.

Any members who cannot parade at Kowloon Ferry at 6 p.m. on the Fridays but can reach camp before the 8 a.m. parade on the Saturday mornings must do so.

Dress: Marching Order, i.e. Helmet, tunic, shorts, puttees, khaki shirts, bandolier, greatcoat and boots. Puttees will be worn Tap at bottom.

All N.C.O.s are reminded that badges of rank in white tape must be worn on khaki shirts.

Khaki slacks may be worn when off duty in evening.

Engineer Co.

The Company will parade at Bachelor's Fort on Tuesday, Nov. 27 at 6.30 p.m. for instruction in Parts of Lamp, Projector and Electrical Circuits.

Dress: Uniform or mufti optional.

Corps Signals

Parade on Monday, Nov. 26 and Thursday, Nov. 29 for Signal Instruction at Corps Headquarters at 5.30 p.m. Dress: Mufti.

Mounted Infantry Co.

Thursday, Nov. 22 at Corps Headquarters for M.G. Instruction at 6.30 p.m.

Dress: Uniform or mufti optional.

Armoured Car Co.

Car Section. Friday, Nov. 23.

Parade at 5.30 p.m. outside Kowloon Railway Station to proceed by road to Fanling Camp. Dress: Tunic, shorts, puttees, nose-tops, helmet, bandolier belt (no side arms) and rifle.

Friday, Nov. 30. There will be no parade.

Monday, Nov. 26. Parade at Corps Headquarters at 5.30 p.m. for M.G. Instruction. Dress: Mufti.

Motor Cycle Section

Annual Camp—Friday, Nov. 23 to Sunday, Nov. 25.

All ranks will parade with motor cycles outside the Kowloon Railway Station at 5.30 p.m. on Friday, Nov. 23 ready to proceed to camp by road.

Dress: Uniform with breeches, bandoliers, belts, haversacks and waterbottles, no sidearms.

Cap will be worn and helmets carried slung from the left shoulder strap. Greatcoats will be carried and rifles slung.

Motor Cycle combinations will be in charge of L/Cpl. Rogers and Thomas.

A special lighter will be ready at the Hong Kong side to convey machines across the harbour. All machines must be on board by 5.10 p.m.

Machine Gun Co.

The Company will parade as strong as possible at 5.30 p.m. on Tuesday, Nov. 27 at Corps Headquarters for Advanced Gun Drill. Traversing and Corrected Elevations.

Scottish Co.

Thursday, Nov. 29. Platoons will parade at 5.30 p.m. for M.G. Instruction, dress mufti, as follows:

Nos. 5 and 7 Platoons at Corps Headquarters.

No. 6 Platoon at Kowloon Dock. Pipes and Drums will parade for practice at Corps Headquarters on Wednesday, Nov. 28, 1928.

St. Andrew's Ball. It is hoped all those attending will do so in the Kilt.

Dress: Diced Hose, flashes kilt, sporran, white Mess jacket and vest, later with small brass Corps buttons.

Church Parade—as previously announced orders will take place on Sunday, 2nd December. A full strength parade is requested.

Parade at Corps Headquarters at 10.30 a.m.

Dress: Review Order without rifle, i.e. spats, diced hose, flashes kilt, sporran, tunics, belt and sidearms. Glengarry. Medals will be worn. After parade the Chieftain of St. Andrew's Society, The Hon. Mr. C. Gordon Mackie, will be "At Home" to the Company at Corps Headquarters.

Portuguese Co.

The Company will parade at Volunteer Headquarters on Friday, Nov. 30 at 5.30 p.m.

It is most important that all ranks attend this parade.

The Peak Range has been allotted to the Company Rifle Club on Sunday, Dec. 2. Firing will commence at 9 a.m.

Reserve Co.

Wednesday, Nov. 28. Parade at Corps Headquarters at 5.15 p.m. and proceed to Kennedy-road Range by Ford Truck for Machine Gun Firing practice. Dress: Mufti.

Strength

The following recruits are taken on the strength and posted as under:

No. 1421 Pte. W. A. Simpson.

M. C. Section, from 15. 11. 28.

No. 1422 Pte. G. Remedios, No. 9 Platoon, from 15. 11. 28.

No. 1423 Pte. L. M. R. Persira, No. 9 Platoon, from 15. 11. 28.

No. 1424 Pte. H. M. Remedios, No. 9 Platoon, from 15. 11. 28.

No. 1425 Pte. C. T. Quin, No. 2 Platoon, from 16. 11. 28.

No. 1426 Pte. F. Baker, Corps Headquarters from 19. 11. 28.

No. 1427 Pte. C. A. R. Remedios, No. 10 Platoon, from 19. 11. 28.

No. 1428 Pte. H. M. Xavier, No. 9 Platoon, from 20. 11. 28.

No. 1429 Pte. V. Bernardo, No. 9 Platoon, from 20. 11. 28.

"TEST" CRICKETER GOING HOME

LUMBAGO VICTIM

Sydney, Yesterday. The M. C. player, Sam Staples who is suffering from lumbago, has not made the expected recovery and is therefore returning to England at his own request on November 27. —Reuter.

YACHTING**PROGRAMME FOR THE REGATTA**

The programme for the Yacht Club regatta which has been fixed for Saturday, December 22, has now been decided upon, and will consist of the following races:

(1) International Fours, 1 mile;

(2) International Pairs, 3/4 mile;

(3) Club Fours, 1 mile.

It is some years since an international race for members of the Yacht Club was held, and it is hoped that there will be as representative a turnout as possible.

As regards the Club Fours, these will be organised in such a manner as to provide a change from the usual combinations of oarsmen, which the Hong races and other events have produced.

The Canton Rowing Club have invited the Yacht Club to take part in a regatta to be held in Canton in January, and this has been accepted. An invitation has also been sent to Canton to visit Hong Kong at the Yacht Club's Closing Cruise about the end of March, and this will, it is hoped, be an opportunity for entertaining Canton in place of the visit which fell through on November 10.

SERVICE CRICKET

At Soakumput yesterday, an interesting cricket match was played between teams representing the Royal Army Service Corps and the Royal Army Ordnance Corps. The R.A.S.C., who batted first, won by a narrow margin. Their score was exactly 100, to which the highest contributor was Pte. Lyons with 17. Corp. Donaldson took four wickets for 7 runs. The R.A.O.C. compiled only 96 runs, their highest scorers being L-Corp. Morgan 23, and Pte. Cornett 20.

First in Marathon

Breasting the tape yards ahead of his nearest competitor, Arthur Gavin, a varisty student, won a marathon race in good time.

SOCER**MID-WEEK LEAGUE RESULTS**

Yesterday afternoon, three matches in the mid-week football league were decided with the following results:

S. China 3 Ewo Chinese 1
China Athletic 0 Police 0
P.W.D. Chinese 0 Lam Long Wan 0

South China v. Ewo

Played at Caroline Hill, Ewo went down to the homesters by three goals to one. There was no score at half-time, the game up to then being evenly contested. South China found their stride in the second, and goals were put in by Ho Choi-wing, Lo Chuk-wan and Chan Lui-sung. Ewo just managed to break their "duck" and then were tied down by their opponents.

Athletic v. Police

This game was played on St. Joseph's ground. It was a well contested game with the Chinese just scrapping through with the only goal of the match. The first half was goal-less, both sides missing some good chances. It was anybody's game until Leung Tuk-wing scored just before the final whistle. The Police had bad luck not to share the points. —P.W.D. v. Lam Long Wan

This game was very keenly contested, and goal-less draw was a proper indication of the run of play which was of a ding-dong nature. Both teams had strong defences and these managed successfully to shut the forwards out.

League table to-date:

P. W. D. L. Pts.

Athletic 7 5 1 1 11

P.W.D. Chinese 7 3 3 1 9

Lam Long Wan 7 3 1 3 7

Police 7 2 0 5 4

South China 3 2 0 1 4

Ewo Chinese 5 1 1 3 3

Hung Kui School 4 1 0 3 2

The following games have been ordered to be replayed by the League Management Committee:

S. China v. Ewo Chinese played on October 3.

Hung Kui Sch. v. South China played on October 10.

These games were won by South China who drop four points.

RUGGER**"HERMES" DEFEATS A CLUB SIDE**

Rugger enthusiasts enjoyed a very close match at Happy Valley yesterday when a strong fifteen from H.M.S. "Hermes" met and defeated a Club team by a narrow margin, the scores being 6 points to 3.

"Hermes" had the better of the first half, and were exceptionally good in the scrums. Farrant touched down on the right five minutes after the match started, but Hammond failed to convert. Ten minutes later, Warren touched down on the left, but Hammond's kick again failed to materialise.

Six points down at the interval, the Club played with determination at the resumption, and by adopting foreful tactics, managed to keep the "Hermes" out of the danger zone throughout the second half. On their part, the Club forwards carried out a successful raid in which Smith managed to touch down, but Scott failed to convert.

Although both sides tried hard after this, there was no further scoring.

SNOOKER

In the Palace Hotel snooker championship, last night, J. Witchell received a walk-over owing to his opponent not putting in an appearance.

This evening there are two matches down for decision, as follows:

6 p.m.—Mr. "B" versus Mr. E. A. Remedios.

9 p.m.—Mr. Sinn versus Mr. Buxton.

"JEROLIN"

Cod-Liver Oil Emulsion "RIEDEL" with an extra high percentage of Calcium hypophosphate as a strengthening and nutritious remedy.

Cod-Liver Oil, the fat oil gained from the liver of the cod-fish, which inhabits the northern Atlantic Ocean in innumerable shoals, and which has been well-known for more than half a century, is highly regarded all the world over as a nutritive supporting the condition of the body, and especially strengthening children.

Besides our "JEROLIN" possesses the very valuable quality of not becoming decomposed for many months, if properly stored.

"JEROLIN" contains a constant uniform percentage of medicinal Cod-Liver Oil and admixtures of approved osteogenic Calcium Salts, Hypophosphites and some aromatic ingredients.

"JEROLIN" is easily assimilated and digested, palatable and appetizing.

Doses: Infants three times a day a tea-spoonful. Adults and children three times a day a table-spoonful.

FOR CHARITY

(Continued from Page 2.)

The establishment in Hong Kong of an Industrial School by the Salesian Fathers is a considerable help to the Society in the difficult task of providing employment for the children of the poor. Without a training in any trade, and little or no knowledge of English, these young boys have hitherto had no qualifications to fit them for any but the most menial work.

St. Joseph's Home for Aged Poor

6. This Home was assisted to the extent of about \$2,000.00 per annum by the Society before it was taken over by the Little Sisters of the Poor. As the rules of their Order oblige these Sisters to beg each day for the maintenance of their charges, and do not allow them to have any fixed income, the Society has not been called on to make any regular allowance to the Home during the period under report. \$200.00 was, however, given as a donation at Christmas, and \$100.00 on St. Joseph's Day (19th March).

The Council desires again to record with gratitude the assistance given to the Society by this Home in receiving, as accommodation permits, a number of aged Poor for whom, owing to their advanced age and feeble health, the Society is not in a position to provide the comforts which are found at the Home. The Home is now situated in large premises and extensive grounds at Ngau Chi-wan, near Kowloon City, and the good Rev. Mother is always glad to receive visitors and show them over the place.

Expenditure 1918-1927

It is interesting to record that during the 10 years 1918-1927 the total expenditure of the Society was \$158,072.42. The principal Relief to the poor in money and provisions (including special Christmas grants) \$78,594.33, Education of poor children \$39,253.88, Home for the Aged Poor \$21,224.55, Rent grants \$6,486.87, Medical Aid \$2,738.18, Clothing, shoes and blankets \$3,255.78.

Acknowledgments

8. Contributions towards the Society's Fund during the first nine months of 1928.

The Society depends

almost entirely on these two public appeals for the maintenance and extension of its work among the Poor of this Colony.

HONEST VALUE

STILL BASIS FOR GOOD BUSINESS

AGE-OLD PRINCIPLE

Cleveland, Ohio.—This modern day, despite its remarkable progress and achievement in all lines of endeavour, has not as yet found a substitute for the good old principles of sound quality and honest value in merchandising goods, declares Mr. H. J. Leonard, president of the Stearns Knight Corporation of this city.

"On the contrary, manufacturers have turned more strongly than ever to that age-old principle to achieve lasting success in the sales field. With national and world-wide distribution of so many kinds of products, nothing but an honest reputation for quality and value will permit any merchandise long to compete, whether it be needles or motor cars.

Splendid Sales

"Perhaps this truth bears with more force on the automotive trade than on any other, owing to the sterner demands of competition, and the world-wide distribution of all the leading makes. We feel that the splendid sales record of our organisation throughout the past 28 years and the continual growth made by our company since its inception, is direct proof that we have achieved success through marketing product that was fundamentally sound."

"In the production of both the Stearns-Knight eight-cylinder cars and the Stearns-Knight sixes, we have adhered to the principle of honest value more closely than ever before in order to fulfil the expectation of our clients for a luxury car of the highest quality."

Mr. Leonard made this statement following the announcement that sales of the Stearns-Knight cars had on September 1, passed the total sales mark registered in the entire twelve months of last year.

IN BESSARABIA

THE FIRST TOURIST TRIAL

Bessarabia, which became part of Roumania after the war, is undergoing rapid changes and in the whole region an ever increasing display of activity is apparent. The problem of transport is receiving its due share of attention; new roads are being opened up and the whole machinery of transport is being steadily improved. With a view to encouraging every initiative in this direction, both public and private bodies are vying strenuously with each other in promoting trials, competitions, and other means of propaganda. Notable amongst these is the First Tourist Trial which took place recently. It was opened only to touring cars and was run over a most difficult 290 miles course.

Twenty-seven cars representing the following makes started: Oakland, Buck, Overland, Ford, Erskine, Pontiac, Essex, Ansaldo, Oldsmobile, Chandler, Rugby, Peerless, Paige and Fiat.

A model 520 Flat tower driven by Major Urdareanu arrived first without a single penalisation mark, winning the first prize of 25,000 Lei. A Buck and an Oakland were classified second and third respectively.

BEHIND THE SCENES

VAST AMOUNT OF TESTING

A MOTOR FILM

The vast amount of research work and testing that goes on behind the scenes of the automobile industry is interestingly revealed in a new motion picture film, "Separating Facts from Opinions," produced in the laboratories and Proving Ground of The Studebaker Corporation. It is available to clubs, schools, and amateur home motion picture operators through local Studebaker dealers or the offices of the Corporation in South Bend, Indiana, U.S.A.

The film first shows the critical demands made on the modern car, emphasizing the wide range of conditions under which it must give satisfactory service. Cars are shown bucking snow drifts, pulling through heavy sand under broiling sun of the desert, fording streams, and plunging over rutted roads and through deep mud.

Then the action swings to the Atlantic City speedway, showing The Commander making its record run of 25,000 miles at an average of more than 65 miles an hour.

Research Work

From the speedway the film takes one through the research laboratories, showing every aspect of the development and testing work that goes on incessantly. There are scenes in the "cold room," with mechanics testing a motor at 20 below zero on a hot July day, and views of a car travelling 70 miles an hour on the spinning rollers of the chassis; dynamometer while engineers record details of performance.

One of the most interesting laboratory scenes shows how engineers study the action of moving parts through the use of the stroborama, which flashes an intense light on the part in motion. By synchronizing the speed of the flashing light with the speed of the object, the latter appears to stand still. A fan rotating at 8,000 revolutions per minute, is thus made apparently to stand still before the camera.

After showing experiments in the physical, chemical and electrical laboratories, the action of the film moves to Studebaker's Proving Ground—the 800-acre "outdoor laboratory" where rigid tests are performed. Cars are seen speeding around the three-mile speed bowl, jolting over the rough trail roads, and splashing through the "bathtub" test.

Instruments are shown in operation to record the amount of foot pressure required to operate clutch and brake pedals; to ascertain the fuel consumption at varying speeds and carburettor adjustments and to determine steering effort.

The film is nearly 1,000 feet long, and can be secured either in standard size or in the 16 mm. size for home motion picture outfitts.

without a single penalisation mark, winning the first prize of 25,000 Lei. A Buck and an Oakland were classified second and third respectively.

FROM RANGOON

A CAR'S GRIEVLING TRIP

TO MANDALAY

Though "The Road to Mandalay," immortalized by Kipling's ballad, is non-existent as far as the motorist is concerned, word has just been received by The Studebaker Corporation that a stock Erskine Six tourer recently made its own road on a gruelling trip from Rangoon to Mandalay, India—and not only succeeded in making the trip, but completed it in the record breaking time of 48 hours.

There are literally no roads between Rangoon and Mandalay—a distance of approximately 385 miles. But C. E. Perry, a Rangoon motorist, decided that the trip could be made. With native guide and another companion, he set forth from Rangoon equipped with emergency road making tools, and supremely confident of the power and endurance of the Erskine.

The trip was a cross country run in every sense of the word. Occasionally, there were narrow car tracks to follow, but more often the Erskine blazed its own trail through the jungle. For five hours, at one stage of the trip, the car ploughed through soft paddy fields under a tropical sun that tested to the limit the power and cooling of the motor. In other places the caravan made slow progress through deep sand. There were streams to ford, with water well up over the running boards.

One of the most trying sections of the trip took the intrepid motorists through a region of elephant grass, where progress was made at the rate of a mile in four hours. This gave way to thorn-covered open country, which could be traversed at better speed, though its roughness was a severe tax on the sturdiness of axles, frame, and body construction.

On their arrival in Mandalay the Erskine and its driver were welcomed with a demonstration by members of the National Club, and the feat praised throughout Burma and India as one of the most outstanding accomplishments in Indian motoring.

FASHION IN MOTOR CARS

Those who would eliminate fashion from motor car manufacturing and marketing (says "The Autocar"), far less development, have never asked themselves the question: "What would be the case of the clothing industries and trades if fashions were not changed?" A moment's reflection would reveal that the scale of business done would be less than half that achieved to-day. Car fashions are not changed two or three times a year as are clothing vogues; and yet it is equally obvious, if there were to be no progress in design, the majority of car owners would be content to continue for an indefinite time with the machines they have in present use. Undoubtedly, development is a necessary and inevitable process in promoting demand.

The outstanding success of this new car has increased the number of Willys-Knight owners to more than 325,000.

From the time of its invention, it was impossible to build a Knight motored Six in a low price range; but various manufacturing economies effected by the Willys-Overland Company, enabled the company at last to introduce their Model '56' powered by a Willys-Knight double sleeve valve engine, at the lowest price in the company's 20-year history.

The popular response to the introduction of this car was an instant demand which necessitated immediate increase of the car building schedule; and this demand has continued to increase steadily ever since.

THE INCOME LIMIT

Car-ownership depends primarily on the income limit, and no doubt it is because this has been the subject of some criticism that the Society of Motor Manufacturers and Traders, says a writer in the "Manchester Guardian," deal with the question of income and ownership and potential consumption of private cars in this country. In the 1926 issue of this annual survey of the industry an income of £450 was taken to represent potential ownership of one car, and £2,000 a year potential ownership of two cars.

In the absence of a determined effort to reduce these running costs, only a small annual increase in the number of registrations can be looked for after 1929, and even this increase would fluctuate with the general level of prosperity." The position of the used-car market has been investigated. On July 1 this year a sample of 13,474 used cars in stock only 1.5 represented present registrations. Up to 14-h.p. the majority of cars had been in stock less than three months, and over 14-h.p. the majority had been in stock over three months. This illustrates the handicap which the present method of taxation imposes on the result of car sales.

reduced initial cost of cars and the spread of hire purchase. It is now held that all incomes of over £400 a year represent potential ownership of one car, and £2,000 and over the potential ownership of two cars. And no doubt, it is added, with the development of the baby car persons with less than £2,000 are running two cars. Income between £400 and £2,000 number 692,586, and over £2,000 they number 93,065. This gives a potential ownership of 378,716 cars. As, however, no account has been taken of the considerable number of cars licensed as private cars and run by business firms, it is held that the potential ownership might well be 950,000, or even 1,000,000.

Maintenance Cost
Statistics for 1927 show that the cars actually in use numbered 787,000, and it is expected that the total will be nearly 900,000 by the end of this year. "In spite of experience elsewhere there is therefore reason to think that the exhaustion of further potential car-owners will before long begin to reflect in the registration statistics. In this connection it must be noted that reduction in the initial cost of cars will in future be of limited effect in increasing the number of car-owners, as such initial cost is becoming less important in relation to maintenance cost. It is maintenance costs, particularly garaging and taxation, that in England are keeping the motor-car beyond the reach of income classes which in the United States, Australia, or New Zealand are able to own and run cars.

"In the absence of a determined effort to reduce these running costs, only a small annual increase in the number of registrations can be looked for after 1929, and even this increase would fluctuate with the general level of prosperity." The position of the used-car market has been investigated. On July 1 this year a sample of 13,474 used cars in stock only 1.5 represented present registrations. Up to 14-h.p. the majority of cars had been in stock less than three months, and over 14-h.p. the majority had been in stock over three months. This illustrates the handicap which the present method of taxation imposes on the result of car sales.

Wreck of a car being raised from the Potomac River after it had been driven off a bridge by Roy C. Delaney, a letter carrier, who was drowned. The only witness to the tragedy was the engineer of the passing train, who halted at the first station and notified the authorities.

FINGER DRIVING
WHAT THE NEW GEAR BOX MEANS
"AUTOMATIC" FABLE

(By the Hon. Victor Bruce)
London, Oct. 7.
No matter how the general car control and necessities of maintenance may have been simplified, the matter of gear changing has always been the bane of the novice. One would have added, "and always will be," a short while ago, but indications in connection with the forthcoming Olympic Motor Show in London suggest how a new era is dawning.

One of the great British manufacturers announces that on two of his models is to be standardised a really fool-proof gear box control, with which it is impossible to do other than change cleanly and expertly; which abolishes the dreaded gear lever, and which is equally quiet on indirect and direct ratios. It is a big claim, but is justified.

The Working

Gear changing on this car is not, in spite of public statements that have been made, automatic. The operator, knowing, or may-be only anticipating, that a change to a lower ratio will be desirable in a few moments—for rounding a corner, which he can see a hundred yards ahead on a steep hill—for instance—moves a little finger on the steering wheel around an engraved dial to the position indicated for the lower gear.

Nothing happens then, but when the time comes that the change down is desirable, the driver depresses and releases the equivalent of the clutch pedal. Soundlessly, so far as the change is concerned and without increase of noise from the gear box, the new ratio comes into effect, and the driver, anticipating the development of road conditions ahead, moves the indicating finger either to a still lower gear or back to top, according to whether the conditions of gradient promise to become more or less severe, selecting his own time for making the actual change.

Judgment Remains

This system seems almost ideal, and I should imagine little practice is needed to become accustomed to it. But, it is not automatic, and therein, in my mind, lies its principal charm. It still leaves to the driver the necessity for judgment as to the best time to change gear in order to extract the maximum efficiency from the engine. But faulty judgment holds no penalties in the form of grinding of teeth, or, still worse and more dreaded, the missing of the gears altogether and the danger of the car dropping backwards down the hill!

The completely automatic gear has attracted inventors since the beginning of motoring, and many promising designs have appeared. Generally, however, they suffer from the inherent objection that other factors—factors which are never constant, and therefore cannot be allowed for—that engine speed and road speed enter into the requirements as to the ratio of drive between engine and road wheels.

Human Element Necessary

Normally, in moving off from rest, the automatic gear would start from zero and gradually decrease the gear ratio until, at a given car speed, the highest possible ratio allowed for by the design had been attained. Similarly, in slowing down, so soon as that set car speed had been passed in the slackening of pace, the gear ratio would steadily become lower. But there are many occasions when we wish to run gently at a moderate speed in top gear, or when a hill can be climbed more quickly by dropping into a lower gear than would be proportionate on the level to the speed of the car.

These contrasting requirements cannot be met by a completely automatic gear, though it is possible to fit a supplementary hand control in order to obtain abnormal gear variations. The difficulty is met in just this way in a new automatic and infinitely variable gear, the details of which have just been announced. This is a variation of the age-old friction drive idea, and so far as can be told without actual road experience it promises better than any predecessor on the same lines that I have seen.

Unmechanical Principles

These two developments, anyway, seem to suggest that at last a serious effort is being made to remove the gear changing bogey. Ever since the days of the first motor-car expert and novice alike has been exclaiming against the crude and unmechanical principle of the conventional gear box—the possibility for sliding two revolving pinions into engagement.

In all the years that have passed, practically no progress has been made so far as the average car is concerned, and the same principle is still employed on the vast majority of cars. Detail improvement, increased metallurgical knowledge and so forth have overcome most of the objections to the system of gear changing in question, however, and

GROWTH OF SALES
OVERCOMES SEASONAL UNBALANCE
INDUSTRY'S TREND

Increased use of automotive vehicles in all parts of the world has completely changed the status of a motor car in the average household. Whereas it was once a possession which conferred great distinction on its owners and which was carefully taken out for display when fine weather permitted, it is now merely a means of getting from one place to another in the shortest possible time with a maximum of comfort.

For this reason, all-weather, enclosed cars are rapidly replacing the open car and the automobile is used exactly as much during months of bad weather as during the most pleasant months of the year. As a natural result, automobile sales which used to be crowded into about three months of the year, are now distributed more and more evenly throughout twelve months.

For instance, the Willys-Overland Company of Toledo, Ohio, U.S.A. have just issued a financial statement for the third quarter of the year 1928, showing an increase of 90 per cent. over the same period last year. Their sales in Export markets showed even greater gain, being 117 per cent. larger in the period of July, August, September 1928 than during the same period of 1927.

These figures, however, are not an accurate gauge of the industry as a whole, as Willys-Overland has enjoyed an exceptional growth throughout the entire year—September being the ninth consecutive month in which all previous sales records were broken.

The outlook for the closing quarter was reported exceptionally bright as the popular demand for Whippet Fours and Sixes and for Willys-Knights continues to increase, apparently without relation to the seasons of the year.

MUD, LIONS, & SAND

CAPETOWN TO BELGRADE
BY CAR

A party of four South Africans and one Central African native arrived in Belgrade on October 1, having come all the way from Capetown in the Chevrolet cars, standard models. They had been on the road since March 1, for they had deliberately chosen to make their journey at the worst possible time of the year, during the wet season, to test the reliability and endurance of their cars. Of the 8,000 miles traversed in Africa some 2,000 would seem to have been over land where there were no roads or tracks—they just cleared due north by the sun through elephant grass over six feet tall, through fields of mud, axle deep, and over vast sandy deserts. Their cars were dragged through hundreds of flooded rivers many of which were not marked on their maps, where all bridges had been swept away, were pushed over miles of soft sand and hauled out of swamps by teams of natives. Several times their meat supplies were stolen during the night by lions, but though they did not succeed in bugling any.

From Cairo they passed through Palestine and Turkey to Constantinople and visited Greece, Bulgaria, and Romania before coming on to Belgrade. From their photographs it would seem that they had almost as much trouble on some of the Greek roads as on those of Central Africa. Nor was crossing the Danube an easy task for it took them 28 hours to come from Panchevo to Belgrade on a barge. They left for Italy, Switzerland, France, England, and Scandinavia, and hope to reach Stockholm in a few weeks' time.

Their light van carried a high-power wireless set and they were able to listen in to London concerts when stuck fast in deep black mud in the wilds of Africa and to keep in touch all the time with their friends in Capetown.—Ex.

even without any special arrangement such as those used in the two gears which I have mentioned, there are plenty of ordinary gear boxes which are comparatively simple to use. But the new gear boxes are not merely "comparatively simple," they are definitely fool-proof.

Another tendency towards simpler gear changing is found in the increasing practice of fitting a free wheel clutch to the transmission gear. Since I have already enlarged upon this subject I will not go into details now, but with a freewheel it is possible for the novice to execute changes to a lower ratio at a high road speed which would make the expert hesitate on a normal fixed-wheel car.

The free wheel equally eases the gear box of all its terrors—and the Olympia Show we shall find that it has been adopted on quite a number of British cars.

PIKE'S PEAK
CLIMB SHOWS INTERESTING DEVELOPMENTS
4-CYLINDER STOCK CAR

One of the surprises of the annual Pike's Peak climb for stock cars held early in September under the sanction of the American Automobile Association, was the unusual performance of a stock Whippet roadster. In this grueling test for stock cars over the 12 1/3 mile route from Crystal Creek to the summit of the peak, the Whippet won second place. The car which won first place was an 8-cylinder machine selling at the factory for more than four-times the Whippet's price.

Never before has a Whippet been entered in this great hill climbing classic, which is declared by expert automobile engineers to be the most severe test that could be imposed on a stock car since it demands not only speed and power, but a cooling system that will function efficiently from a very high temperature at the start to the extremely cold encountered at the top of the mountain.

203 Curves

In the event this year, the Whippet left the starting line at Crystal Creek, 9,000 feet above sea level, and proceeded over the dirt highway toward the top, climbing mile after mile and rounding the 203 hairpin curves and dangerous switchbacks which make up the route. It was loudly acclaimed when it raced across the finish line, 14,100 feet above sea level.

Conditions for the race were the worst in the 13 years' history of the Pike's Peak climb. The roadway for the last four miles was a sheet of ice and snow, with a blizzard raging at the top of the peak.

Careful inspection of the Whippet after this terrific test revealed an engine functioning perfectly and showing no signs of overheating. This is said to be one of the finest tributes possible for the car's cooling system.

WHAT IS A MILLION?

GENERAL MOTORS EXPORT HEAD EXPLAINS

Although American business men talk in millions, few of them have any accurate conception of what a "tremendous quantity" 1,000,000 dollars really represents, according to Mr. J. D. Mooney, president of the General Motors Export Company, who recently returned to the U.S.A. after an extended European visit.

Mr. Mooney recounted a conversation in point with an Amsterdam banker at a London banquet. "What will be the extent of your export business in May?" the banker asked.

"Twenty-five million dollars," Mr. Mooney replied.

"How many motor cars did the United States build last year?"

"The United States and Canada built 3,500,000," Mr. Mooney answered.

They talked about American industry. Every query, according to Mr. Mooney, brought an answer in terms of millions.

"You'll have to stop," said the banker finally. "Those figures are no big I can't comprehend them."

"Neither can I," was Mr. Mooney's reply.

Despite the enormous volume of commercial and industrial activity, which is now seldom considered important in less than seven-digit terms, few business men have any conception of the tremendous scope covered by the now commonplace word "million," Mr. Mooney added.

WHEN A CAR IS OLD

When a car gets in a condition that it is hard to start, loses pep on hills and does not perform as well as it used to, the fault lies in not having the machine inspected until after it has reached a condition when its loss of efficiency is conspicuous by its poor performance. An automobile properly serviced should give as good performance after 25,000 miles of driving as it did after 10,000, if a few of the principal minor servicing items are looked after regularly.

From the standpoint of low maintenance cost and satisfactory performance, it will be well to look after the following items at regular intervals: Adjust carburetor, adjust third brush, clean distributor cap, adjust ignition timing, clean battery terminals, change oil in crankcase, adjust or replace fan belt, tighten electric connections.

Clean and adjust contact points, inspect and replace those connections, check oil filter, renewing if necessary; clean motor and generator commutators; inspect spark plugs, replacing if necessary; inspect lighting and ignition switches and relays, and clean all fuel lines, blow out fuel lines and screens.

SPEED PROBLEM
STEERING BY MEANS OF SIGHTS
SAFETY FEATURE

One of the most difficult problems in connection with the attempt by Major H. O. D. Segrave next February to regain for Britain the world's fastest land speed record on the sands at Daytona, Florida, has just been satisfactorily solved.

His 1,000-h.p. car is designed to travel at a speed of at least 240 miles an hour, with a possible maximum of 260. But steering at that speed is another matter.

It has now been decided to equip the car with sights just like a rifle and to steer it much as a bullet is directed to its target. The car itself is shaped like a projectile.

To time this particular record (the stopwatch is far too inaccurate at such speeds) the driver is required to drive his car over electrical timing strips. There are laid out on the sand at the beginning and end of the measured mile course. They are about 26 ft. in length and are indicated by two posts like goalposts.

4 1/2 Miles Start

It is estimated that Major Segrave will require a run of 4 1/2 miles to reach his maximum speed, and he will make his start at this distance from the electrical timing wire.

Two immense targets are to be erected at Daytona on scaffolding above the timing wires, both at the start and finish of the measured mile. Each at its centre will have a big bull's-eye.

The sights on the car and the bull's-eye will be magnified by means of a telescope fixed to the car.

The driver, looking through the telescope, will get the car's sight in line with the centre of the bottom of the bull's eye (six o'clock of the bull), and drive straight at it. As he hurtles under the first target suspended over the start of the timed distance he will pick up the target at the end of the timed distance, steering in the same manner as before.

By this means he hopes to keep a dead straight course. How necessary this is, is clear when the speed of the car is considered. At 240 miles an hour the car travels four miles a minute, or one mile in 15 seconds, or, to reduce it further, a quarter of a mile in under four seconds.

The slightest wandering off the straight line might easily carry him into the sea and mean disaster.

Mercy a Blurred Line

"It is quite impossible to steer accurately by ordinary objects," Major Segrave said. "The flags marking the course are merely a blurred line. The timing posts are too far away to be visible at the start, and when you get near to them they simply jump at you. This new method of steering should be of enormous assistance to me in my attempt."

The cost of Major Segrave's car is being borne by two wealthy London business men, and runs into many thousands of pounds. They are both anxious to see the record regained for England, but one of their stipulations was that the designer should guarantee that the risk run by Major Segrave should be reduced to the lowest possible limit.

This latest development is one of the safety features.

THE BRAKE SYSTEM

THREE IMPORTANT THINGS TO REMEMBER

There are three things of the utmost importance to be considered in the matter of good brakes.

First—Safety. That is probably the most important, for with poor brakes not only a driver's life is endangered, but the lives of pedestrians and other motorists are at stake. An automobile operator owes it to himself to keep his brakes well lined and adjusted, if only for the protection and safety of those riding in the car.

Second—Tires. There is no other one thing more abusive to tires than improperly adjusted brakes, and it is undoubtedly the most neglected adjustment on the automobile of to-day. Some brake on one wheel and some brake on the other, with a total disregard for rubber, and then wonder why they did not get mileage on their tires.

Third—Comfort. Is it necessary to "stamp" on the brakes to bring the car to a stop? There is a world of satisfaction in "knowing" brakes are good, brakes that respond to the slightest touch of the pedal and bring a car to a full stop without "sideways" or "shimmying." It can be readily seen that good brakes add a great comfort to touring and are an absolute necessity in congested traffic—and they prevent a large percentage of skidding. Good brakes are a protection to everybody.

THE 1929 CARS

GREATER POWER, YET MORE SILENT

NEW BODY DESIGNS

The 1929 automobile, a survey reveals, is an interesting study. It presents many new things and clearly depicts a different trend in design and construction. Increased engine power, silence and greater smoothness of operation, improved transmission, lower chassis and new styles in body designs are the outstanding features of the car for 1929.

Competition at Height.

Automotive executives agree that never before in the history of the motor car has competition been so keen and engineers are continually searching for something—both as improvements and as a selling feature to lure the prospective buyer.

Higher compression is one feature of engine design, as is increased piston displacement and improved valve action. Combustion chambers have undergone a change for the purpose of enabling owners to utilise the ordinary type of fuel, with the higher compression. Along with improved cylinder design comes the widespread use of the Invar strut or Nelson type of piston and many manufacturers are using them. However, there is the pro and con in this respect and it is more or less a matter of personal preference.

Increased Bore

Increased piston displacement is found on a few of the engines, the increase being obtained by increasing the engine bore. The average piston displacement of the American four-cylinder engine is 238 cubic inches, of the six about 268 cubic inches and of the eight approximately 300 cubic inches. This reveals that the 1929 car has more power than last year, brought about by public demand.

With this increase of power a greater rigidity of construction naturally follows. In some cars the four-point engine suspension is used

and in this manner the crankcase of the motor is utilised as a rigid cross member of the frame. However, the three-point suspension plan still is evidenced on many cars.

New Internal Gear

One important development of the 1929 car is the increased use of the internal gear. One V-type eight has adopted this system and is laying great stress on its importance. With this internal gear the relative speeds of the meshing gears are synchronised to an extent that allows absolute silence in shifting as well as instant shifting without the necessity of hesitating in neutral. In this respect it has a valuable braking power.

A Huge Fleet for Milk Collection

The transport system of United Dairies, Ltd., who are probably one of the best organised milk combines in the world, is looked after by a subsidiary company, Messrs. Micklem Transport Co., Ltd., who own one of the largest fleets of motor vehicles in Great Britain. This firm have, from time to time, purchased well over 200 vehicles from the Albion Motor Car Co., Ltd., of Glasgow, and as far as the higher load capacities are concerned, they have always shown a preference for the overtire models. In view of the modern design of the overtire models, which form part of the Albion Company's range, it is not surprising to hear that the latest orders from the United Dairies include two overtire 4-tonners, and one overtire 5-tonner. These machines are all fitted with 35/55 h.p. engines, 4-speed gearbox and worm drive, while in the case of the 5-tonner, Dewandre Vacuum Servo Brake Gear is a standard fitting.

The backbone of the Motor-cycle Show was, I thought, the 250 c.c. touring mount. Several firms which heretofore have devoted their attention to bigger mounts, are accepting the "two-fifty" as a satisfactory and economical all-purpose mount.

There were sensational exhibits in the form of a British four-cylinder, exhibited by Brough Superior and another make. Both attracted a great deal of attention.

And so the great Shows have ended with splendid exhibits of the latest improvement from respective factories, and each day the Shows were attended by huge crowds.

AT OLYMPIA

NEW GEAR CHANGE DEVICE

IMPORTANT DEVELOPMENTS

(By L. H. Cadell)

The eve of the great Shows, in their magnificence, did no more than justice to the twin industries. British cars and British motorcycles have proved themselves to be pre-eminent, and each year the latest products of the manufacturers are displayed at Olympia.

There was a display of cars which showed great improvements, even on the fine crop of present-day vehicles. There were cheaper and smaller cars which were better finished and safer.

New methods of spraying body-work so that the outer coat of enamel is preserved and protected have been discovered. As to safety, many cars are equipped with safety-glass as standard. I think that all of them should be so equipped.

Press Button Gear Change

It is good to hear that the Armstrong-Siddeley people have produced, in practical and practicable form the "press button" system of gear changing. The average motorist is more concerned about gear changing than any other control, and the majority of inexperienced drivers dread the necessity of changing down because they find it so difficult to make a clean change.

The introduction of a gear-changing system which will eliminate "crashing," and which can be produced commercially without putting up the cost of the car too much represents the most important advance in the development of the motor-car since the introduction of the self-starter.

Attractive "Bubbles"

The elimination of lever changing is not new. It was tried out two or three years ago, but its employment entailed such an increase in weight that it was not really a practicable proposition.

The infinitely variable gear which is secured with friction drive represents another method of cutting out "crashing," but friction drive has drawbacks. The great point is that the display of a car of this type at Olympia inserts the thin end of the wedge whose thick end is the final overthrow of the present means of changing gear.

There were some very attractive baby saloons with an available selection of about half a dozen miniatures and it is to be expected that there will be a big demand for this type next year.

The Motor-Cycle Show

The Cycle and Motor-cycle Exhibition, which took place at Olympia during the week beginning November 5, has been a particularly interesting one.

The fact that the small car is becoming extremely popular does not affect the motor-cycle movement so much as might be supposed. Motor-cycles are going down in capacity and price, so that the movements keep to parallel lines.

There were many ultra light-weight machines at Olympia, and there was a general tendency toward the reduction of weight and power. There is no doubt at all that the average machine is much too heavy. Dirt-track racing may assist the designers to reduce this, and most decidedly the influence of the speedways will be made manifest.

A dozen firms exhibited special dirt-track models designed for the specific purpose of Speedway Racing. These have tiny petrol tanks, low built and save such unnecessary impediments as mudguards.

So far the Douglas has been the most popular machine on the speedways, but it will have many rivals next season. The industry is still opposed to the new sport on the score that it is more harmful than beneficial to the general movement, but this has not prevented the manufacturers from catering for the growing army of riders who are assailing the one-time impregnable position of the Australian experts.

The Price Question

There were not any appreciable price reductions at either of the Olympia Shows. Cars and motor-cycles were very near to rock bottom on list figures, and the manufacturers have not been able to make any material concessions to the buyers.

The backbone of the Motor-cycle Show was, I thought, the 250 c.c. touring mount. Several firms which heretofore have devoted their attention to bigger mounts, are accepting the "two-fifty" as a satisfactory and economical all-purpose mount.

There were sensational exhibits in the form of a British four-cylinder, exhibited by Brough Superior and another make. Both attracted a great deal of attention.

LADY MOTORISTS

MISTAKES MADE ON THE ROAD

DRIVING BOLT-UPRIGHT

George Meredith declared that "woman will be the last thing civilised by man."

When I met behind some women drivers on our roads I am inclined to believe him, writes Lady Lawford. The average woman has no love for machinery. Watch her prod at the shuttle of her sewing-machine with a screw-driver or over-wind the child's last clockwork engine, and you will readily be convinced of this. Of course, there are the exceptions, and I have met women motorists more careful and capable than the average man driver—but not many.

Two Great Faults

The great fault that nearly all women drivers suffer from—and I write with a good deal of experience—is that they cannot leave the middle of the road, for the reason, no doubt, that it is easier to drive there.

A little to one side, and the car "heels" a bit, so the driver must keep a fairly firm grip of the wheel, which, one grants, is fatiguing on long-distance runs; hence the line of least resistance.

Another factor I have often noted is that few women drivers "get down" to it. They nearly always sit in a bolt-upright, uncomfortable position.

Now, in a long-distance run a man lies back comfortably in his seat, his body rather sideways in the car—a thoroughly easy, natural attitude that does not tire, while giving him complete control of the machine.

During the eighteen years in which I have driven a motor-car and done all my own repairs I have come across extremely few women who knew anything worth while about the inside of the machine they were driving. I remember, in this connection, one woman who started off one day with her car making a noise like an eighteen-pounder gun. In between the loud explosions she explained that it always did that when it was tired.

"Careful" Intimated

And I met another woman who was "fearfully intrigued" when I showed her the inside of the carburettor; she had always believed it was solid, and simply could not understand why the float had a hole in it.

Just watch the average woman driver being overtaken in traffic by another car or other vehicle—she hardly ever relies on her mirror, but will nearly always turn her head—a dangerous practice likely to lead to complications if not to accidents.

The fact that Euclid and geometry do not figure among the usual subjects taught in the average girls' school is the probable cause of women drivers taking almost impossible corners at hair-raising speeds, as they frequently do, and this with an airy disregard for the white lines painted on the road.

The pity of it is that, in my opinion, women would make very good motorists if only they would take the trouble. Too many trust to men drivers "giving way" at all times, and to male courtesy generally, while others, I fear, believe implicitly in luck all the time. As a result, women drivers are not so popular on our roads as they could be.

ASCOT-PULLIN

A "CAR ON TWO WHEELS"

NEW CYCLE

A new motor-cycle, possessing several novel features, was shown to a company of interested experts and others at the Savoy Hotel, Strand, at the invitation of the directors of the Ascot Motor and Manufacturing Co., Ltd. and Mr. Sybil G. Pullin, designer and patentee.

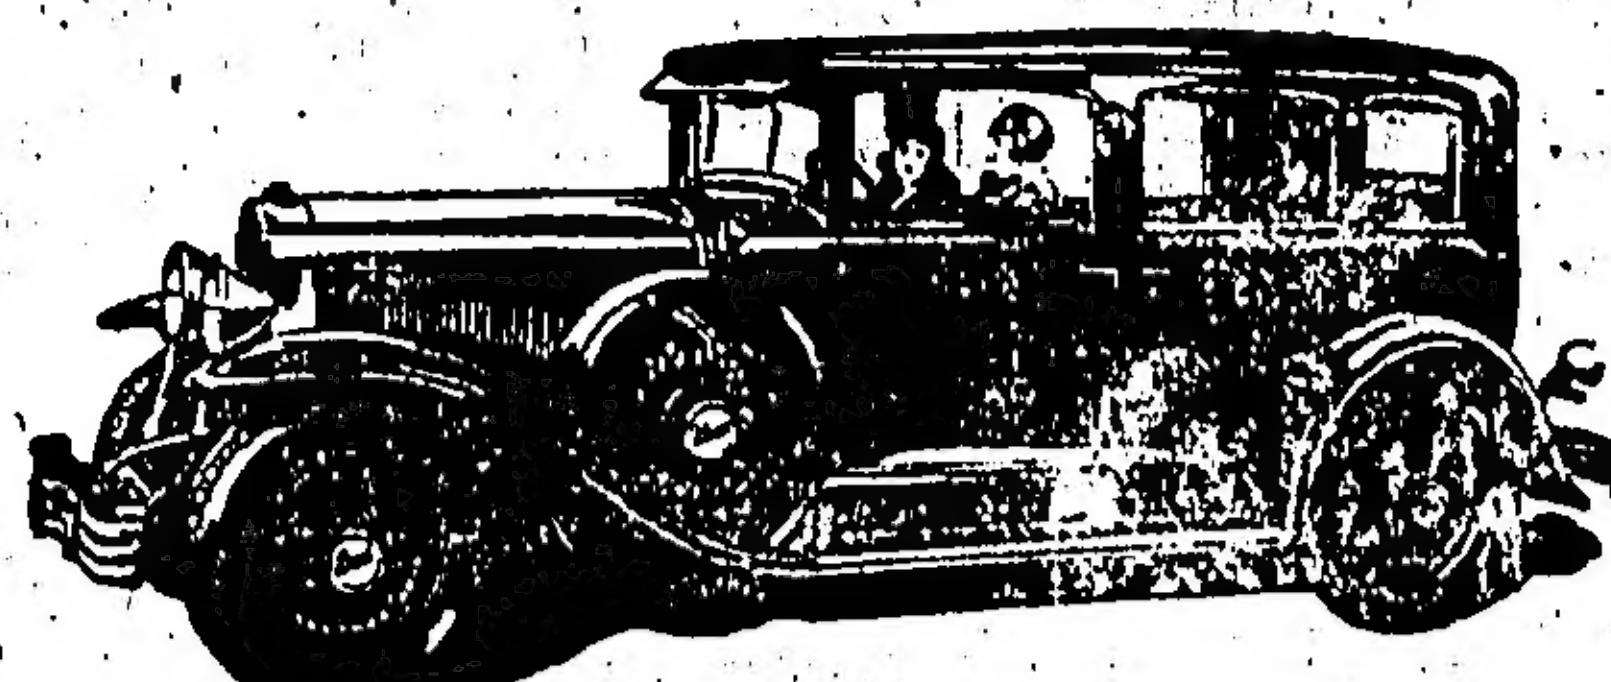

The new cycle, from the present machines, which are adaptations of the pedal bicycle, and is built on car lines, pressed steel being used instead of tubes. It claims to be a "car on two wheels," and has its dashboard, with clock and speedometer, etc. The petrol tank holds 4½ gallons, sufficient for a journey of 500 miles. The low centre of gravity, it is claimed, makes the machine very steady in traffic. A sidecar on springs, built very low, can be attached to the cycle.

9 H.P. CLYNO

The Most Economical Light Car

L.C.LTD.

The new Buick is the new Style

Men and women on every street--in every city and town--are pronouncing the new BUICK with Masterpiece Bodies by Fisher, the most beautiful automobile of the day.

panels involving the most costly steel paneling work employed on any car in the world!

And as the weeks have passed—and the full significance of Buick's achievement has become apparent to the public—enthusiasm for this car has swelled and grown to unprecedented proportions!

Buick sales records have been broken! Production schedules have been increased again and again! The great Buick plants are working to the limit of their capacity to supply the demand.

Not Chrysler but the Chrysler Public

BROADLY speaking, the measure of any man's success is the size of the public behind him.

He grows as his public grows—as his acts are approved in increasing volume by an increasing public.

These few words tell almost all there is to the Chrysler story—or give, at any rate, the root-reason why Chrysler looms large on the motor-car horizon.

This, it seems to the Chrysler management, is the urgent need of every manufacturing institution which aspires to satisfy a swift-moving public—to realise that it does move, that yesterday is dead, that laurels wither, that today is gloriously alive, that tomorrow calls clamorously for greater and greater endeavor.

Due to arrive per S.S. "President McKinley."

Price \$4,300

Completely equipped, with rear windshield and 6 wire wheels.

THE DIPLOMATS AT IMPERIAL TELEGRAPH NEW YORK'S STOCK MARKET PEKING BILL

STATUS QUESTION

IMPORTANT STATEMENT IN THE HOUSE OF COMMONS

"FULLY AND FRANKLY"

London, Yesterday. In the House of Commons, in answer to questions, Mr. G. Locker Lampson (Under Secretary for Foreign Affairs) said that as far as the Government was aware no Power intended immediately to raise the status of its representative in Peking, and that Britain did not propose any definite change until views were fully and frankly exchanged with other interested Powers.—Reuter.

FOR DIPLOMATS

M.P.'S AND THE QUESTION OF PENSIONS

LABOUR PARTY'S SUPPORT

London, Yesterday. The House of Commons last night resolved, by 312 votes to 35, to allow the introduction of a Bill granting members of the diplomatic service the same pensionable rights as other members of the civil service. It was explained after the amalgamation of the diplomatic service with the Foreign Office in 1919, a diplomat who happened to be employed continuously in the Foreign Office could qualify for no pension whatever, since only service abroad counts. The proposed Bill would bring all diplomats under the civil service superannuation act.

One or two members of the left wing of the Labour Party criticised the proposal, but Mr. Ramsay MacDonald, the leader of the Labour Party, disagreed strongly with their comments and stated that he looked forward to transforming the civil service into a far more active agency of national organisation and government than at present. The very highest ability was essential in the civil service and he intended to vote for one of the means of making that service so attractive as to prevent its members being tempted into leaving it for better paid occupation.

His view was supported by other members of his party, including Mr. J. H. Thomas and Mr. Charlton, a member of the selection board of the diplomatic and consular services—British Wireless Service.

MOTOR MERGER

THE HUMBER, HILLMAN AND COMMER AMALGAMATE

SHAREHOLDERS AGREE

London, Yesterday. Details are published of a merger which is proposed of the three motor manufacturing firms of Humber, Hillman and Commer cars. The two first are engaged in the production of motor-cars and their factories are near each other at Coventry. Commer cars is a Rutton firm manufacturing commercial motor vehicles.

Humbers are to be the holding company and the capital of the new combine will be about £1,260,000. Shareholders in the Hillman firm, which is a private company, and those of the Commer Company have agreed to the merger, and the proposal is now before the Humber shareholders—British Wireless Service.

SIR W. CHILDS

A NEW HEAD OF C.I.D. APPOINTED

London, Yesterday.

Mr. Trevor Bigham, assistant Commissioner of the Metropolitan Police, will in future assume the control of the Criminal Investigation Department, in place of Sir Wyndham Childs, who resigned recently.

Mr. Norman Kendall, the Deputy Commissioner, will take over the duties hitherto performed by Mr. Bigham. The latter has for a long time made a close study of criminal investigation work—British Wireless Service.

M.P.'S DEBATE

LEADER OF THE OPPOSITION MOVES REJECTION

SECOND READING PASSED

London, Yesterday. In the House of Commons, Mr. A. M. Samuel, Parliamentary Secretary to the Treasury, in moving the second reading of the Imperial Telegraph Bill, said the partner governments were satisfied that the price was entirely adequate.

Mr. Ramsay MacDonald, (Leader of the Opposition) in moving its rejection, declared that the Government had no right to alienate public property and public control.

They had abused their trust. He hinted that a future Government might reconsider the validity of the contract, and argued that the Government were not bound to accept the recommendations of the Imperial Wireless Conference.

He also declared that it was absurd that Government representatives on the company should be nominated and approved by the company, and he thought that the Advisory Committee had not sufficient powers to compel the Board of Directors to carry out their will or advice.

He urged that the contract should be debated in the House.

Sir John Gilmour, in winding up the debate for the Government, emphasised the necessity of keeping alive cable communications for the purposes of safety and secrecy.

He quoted figures showing increasing losses in the operation of Government cables and also stated that the Foreign Office could qualify for no pension whatever, since only service abroad counts.

The conference was faced with the problem of maintaining cable communication, at least a costly method for the taxpayer, and some method of working which would enable the freest development of the latest inventions through beam or otherwise.

Sir John Gilmour also pointed out that the Advisory Committee represented all the governments and that the latter were additionally responsible in their respective countries to safeguard a proper service in the public interest.

Mr. MacDonald's motion was defeated by 253 votes to 184 and the bill passed its second reading.

THE TURMOIL

DEALING WITH 6,000,000 SHARES

RECORD PRICE FOR SEAT

New York, Yesterday. The turmoil of the opposing forces, at the opening of the stock market, and the volume of trading were again enormous and is now approaching six million shares but the rise in prices was sharply checked and considerable profit-taking was in evidence all day. The tone of the market at about 2.30 p.m. was decidedly weak, but prices rallied at the close.

A seat in the Stock Market sold for \$525,000, which is a new record.—Reuter's American Service.

London, Yesterday.

In the House of Commons, Mr. A. M. Samuel, Parliamentary Secretary to the Treasury, in moving the second reading of the Imperial Telegraph Bill, said the partner governments were satisfied that the price was entirely adequate.

Mr. Ramsay MacDonald, (Leader of the Opposition) in moving its rejection, declared that the Government had no right to alienate public property and public control.

They had abused their trust. He hinted that a future Government might reconsider the validity of the contract,

and argued that the Government were not bound to accept the recommendations of the Imperial Wireless Conference.

He also declared that it was absurd that Government representatives on the company should be nominated and approved by the company, and he thought that the Advisory Committee had not sufficient powers to compel the Board of Directors to carry out their will or advice.

He urged that the contract should be debated in the House.

Sir John Gilmour, in winding up the debate for the Government, emphasised the necessity of keeping alive cable communications for the purposes of safety and secrecy.

He quoted figures showing increasing losses in the operation of Government cables and also stated that the Foreign Office could qualify for no pension whatever, since only service abroad counts.

The conference was faced with the problem of maintaining cable communication, at least a costly method for the taxpayer, and some method of working which would enable the freest development of the latest inventions through beam or otherwise.

Sir John Gilmour also pointed out that the Advisory Committee represented all the governments and that the latter were additionally responsible in their respective countries to safeguard a proper service in the public interest.

Mr. MacDonald's motion was defeated by 253 votes to 184 and the bill passed its second reading.

The conference had not intended to stowaway, but had been left on board the s.s. "Empress of Canada" as a result of missing the last launch ashore. He had reported the affair to the captain of the "Canada" but the latter refused to stop the steamer.

Defendant appeared before Mr. E. I. Wynne-Jones on a charge of evading legal payment.

The prosecution said that they accepted defendant's statement that it was through misadventure that he had arrived in the Colony.

Mr. T. McKechnie appeared on behalf of the Canadian Pacific Steamship Co. Ltd.

In committing defendant to the House of Detention, Mr. Wynne-Jones, addressing defendant, said that he must wait a favourable opportunity to return to Shanghai.

JAPAN'S "REDS"

99 BEFORE THE COURT AT OSAKA

TUSSLE WITH THE POLICE

Osaka, Yesterday. The first public trial of ninety alleged Communists, who were arrested at the time of the Radical round-up in the spring, took place this morning.

A lively scene occurred shortly prior to the opening when the friends and relatives of the prisoners attempted to enter the court building despite the fact that they were forbidden. They engaged in a tussle with the police, who arrested several.—Reuter.

Amsterdam, Yesterday.—The death of Mr. Leis, head of Smit & Company, International Towing Service Contractors, who towed the Singapore floating dock.—Reuter.

Berlin, Yesterday.—The death is announced of Herr Hermann Sudermann, the well-known author and dramatist.—Reuter.

WILLIAM HAINES
